

Your water. Perfected!

## Connecting SOFTENER to ROUTER Setup Instructions

IF YOU CHANGED ROUTERS OR JUST NEED TO RE-CONNECT (if you already created the account on the website previously), YOU SIMPLY NEED TO DO STEPS 1-4.

Router will need to be 2.4 GHz compatible.

1. In front of the system you will be in the main menu - click on the middle circle button then scroll down to Advanced Settings, click middle circle button again, then scroll down to Wireless Setup, then Select Browser then push the middle button TWICE.
2. On your laptop/computer go into where you view the wireless networks in range. Select the one that says H2O (followed by 12 characters).
3. Once that's connected, open your web browser on your laptop/computer. In the URL field (where you put in a website). Type in 192.168.0.1 then press ENTER.
4. It will then show you wireless networks in range. On THIS screen you will now select YOUR home wifi network, and input your password where it says to do so.

Once done, the system should say connected. You may now login to your app or on the wifi website and read the data.

Your Water. Perfected!

## EcoWater Systems Wi-Fi Mobile App Instructions

To locate the **Mobile Phone Application** to monitor your EcoWater Filtration System remotely, follow these steps.

Go to your Android or iPhone APP Store.

Search for the “Ecowater Systems Wi-Fi Manager” application.

- Download and Install the application on your phone.

Open the App and log in.

### **TO LOGIN:**

**USERNAME** is your email.

**PASSWORD** is Softener123

- Be sure to spell it correctly - with a Capital “S”

Click the box: “Remember Me” to prevent you from having to log in each time.

Click on your name or location of the **Softener/Iron Filter** to open the dashboard.

**You should be GOOD TO GO!**
